

Wealth is your birthright.

Susie Carder started out as a low paid hairdresser trying to support her 2 little girls. But working for someone else became a challenge (to say the least).

So she decided to do whatever it took to create her own business. After much blood sweat and tears (mixed with cheap mascara) she went on to create, not one, but two \$10 Million companies!

Her core genius is the ability to simplify complicated issues by creating simple proven systems that are guaranteed to create dramatic growth for any company. She has helped over 100,000 entrepreneurs increase their revenues by more than 3000% and worked with top business moguls including John Assaraf, Lisa Nichols, Steve Harvey, Doug Carter, and Paul Mitchell.

Her newest book (number 10) 'Power Your Profit' is a bulletproof start-to-finish plan for taking your business from startup mode to the multi-million-dollar mark.
